Soviet Railways to Russian Railways J. Westwood 2001-12-02 In the postsoviet decade Russian railways remained highly centralised, evaded the upheavals of mass privatisation, and remained the backbone of a demoralised economy. Preserving much of Soviet practice, the Railways Ministry mounted a skilled rearguard action that achieved a gradual and considered adaptation to the market economy rather than the pell-mell, western-orientated, liberalisation that afflicted other branches of the economy. This book describes that rearguard action, and goes on to show how railway managers are coping with the new conditions.

Songs of Innocence and of Experience William Blake 2019-12-20 Songs of Innocence and of Experience is an collection of poems by William Blake. It appeared in two phases. A few first copies were printed and illuminated by William Blake himself in 1789; five years later he bound these poems with a set of new poems in a volume titled Songs of Innocence and of Experience Shewing the Two Contrary States of the Human Soul. William Blake was also a painter before the songs of innocence and experience and made paintings such as Oberon, Titania, and Puck dancing with fairies. "Innocence" and "Experience" are definitions of consciousness that rethink Milton's existential-mythic states of "Paradise" and "Fall". Often, interpretations of this collection centre around a mythical dualism, where "Innocence" represents the "unfallen world" and "Experience" represents the "fallen world". Blake categorizes our modes of perception that tend to coordinate with a chronology that would become standard in Romanticism: childhood is a state of protected innocence rather than original sin, but not immune to the fallen world and its institutions. This world sometimes impinges on childhood itself, and in any event becomes known through "experience", a state of being marked by the loss of childhood vitality, by fear and inhibition, by social and political corruption, and by the manifold oppression of Church, State, and the ruling classes. The volume's "Contrary States" are sometimes signalled by patently repeated or contrasted titles: in Innocence, Infant Joy, in Experience, Infant Sorrow; in Innocence, The Lamb, in Experience, The Fly and The Tyger. The stark simplicity of poems such as The Chimney Sweeper and The Little Black Boy display Blake's acute sensibility to the realities of poverty and exploitation that accompanied the "Dark Satanic Mills" of the Industrial Revolution.

Vlasov and the Russian Liberation Movement Catherine Andreyev 1987 Vlasov and the Russian Liberation Movement deals with the attempt by Soviet citizens to create a Russian anti-Stalinist liberation movement during the Second World War. These Soviet citizens were mainly prisoners-of-war, forced labourers or part of the population of the occupied territories of the USSR. The Liberation Movement was encouraged by German officers who disagreed with Nazi policy towards the USSR, as their experience showed that treating the population as 'subhumans' (Untermensch) merely increased resistance to Nazi occupation. Throughout the development of the Liberation Movement there existed a divergence of aims between the Russian members who wished to form an army and a political movement which would effect change within the USSR, and its German supporters who merely wished to alter the type of propaganda directed towards the population of the USSR. Catherine Andreyev provides an account of the evolution of the Russian Liberation Movement and examines the motivation of the titular leader of the movement, Lieutenant-General Andrey Andreyevich Vlasov. The main focus of the book is the ideology of the Liberation Movement, the importance of which lies in the fact that it represented the first grass-roots

opposition movement within the Soviet Union since the end of the Civil War in 1922. The programme of the Movement reflects issues which would have been raised by citizens in the 1930s had they been free to do so. Catherine Andreyev examines influences on the programme, and the ideas expressed are placed within the context of the pre-war Soviet and Russian émigré society.

Architect of Soviet Victory in World War II Richard W. Harrison 2010-04-13 The Red Army's leading operational theorist in the 1930s, Georgii Samoilovich Isserson was the mastermind behind the "deep operation"—the cornerstone of Soviet offensive operations in World War II. Drawing from an in-depth analysis of Isserson's numerous published and unpublished works, his arrest file in the former KGB archives, and interviews with his family, this book provides the first full-length biography of the man. The bulk of the narrative deals with the flowering of his intellectual talents from 1929 through 1941. Additional chapters deal with Isserson's arrest and his remaining 35 years, 14 of which were spent in labor camps and internal exile.

The Third World in Soviet Military Thought Mark Katz 2012-07-26 First published in 1982, this study traces the development of Soviet military thinking on the Third World and assesses its importance for the conduct of Soviet foreign policy. Changes in Soviet military thought often reflect changes in Soviet attitudes towards and expectations from involvement in Third World conflicts. This work from Dr. Katz meditates upon the changing role of the USSR in post-war Third World conflicts, with particular emphasis upon the Brezhnev era and the way in which US setbacks in the Third World impacted upon Soviet foreign policy and changing attitudes to the Third World.

The Law of One Price Jonathan Haskel 2001 The National Bureau of Economic Research, Inc. (NBER) presents an abstract of a paper entitled "The Law of One Price--A Case Study," by Jonathan Haskel and Holger Wolf. Retail transaction prices are used to examine the extent of violations of the law of one price. The findings suggest that strategic pricing or other factors resulting in varying markups are reasons for the observed divergences. Users may purchase the full text of the paper.
