**Liberal City, Conservative State** Robert William Thurston 1987-09-17  
Between 1906 and the outbreak of World War I, Moscow was the locale of great uncertainty and experimentation. Moscow's liberal leaders sought social and political stability for their city following the violence of the 1905 revolution by offering attractive programs in education, employment, housing and other areas to Moscow's unruly lower classes. They were countered in their efforts, however, by central authorities of the Old Regime, who feared the political effects of these programs and stressed social rigidity. Liberal City, Conservative State examines the resulting clash between the city and the state as it brought to the surface and exacerbated the deep tensions plaguing Russia by the eve of World War I. It focuses on the roots of this dispute, juxtaposing the Old Regime's rural background and orientation with the urban concerns of

Moscow's liberals, and sees the state's essential failure in its inability to come to terms with the realities of urban life and growth. Providing new perspectives and insights into Russian liberalism, the scope and urgency of urban problems, and the importance of tsarist ideology in conditioning development after 1905, Moscow's story sheds light on the unsolved dilemmas and contradictions that pushed Russia inexorably toward revolution.

**Mezhdunarodnye Vyssie Hidrologiceskie Kursy JuNESKO pri Moskovskom gosudarstvennom Universitete im. M.V. Lomonosova // Moskovskij gosudarstvennyj Universitet imeni M.V. Lomonosova ; 13** 1982

Russian Second-language Textbooks and Identity in the Universe of Discourse Olga Mladenova 2004 This book provides an overview of the changes of the Second-Language Learning discursive formation and the Identity discursive formation in Russian history. It proposes an explanatory model in which small-scale linguistic detail is joined with larger-scale language units in order to illuminate matters of cultural importance in their linguistic guise.

**Московский государственный** 1972

**Education in the Soviet Union** Mervyn Matthews 2012-05-04 This

book provides a comprehensive survey of the successes and failures of education and training in the Khrushchev and Breshnev years. The author gives an objective assessment of the accessibility of the main types of institution, of the contents of courses and of Soviet attempts to marry the functioning of their education system to their perceived economic and social needs. In addition the book has many useful and original features: For ease of analysis it summarises in diagram form complex statistics which are not usually brought together for so long a time period. It provides a systematic account of educational legislation; Matthews' comparison of series of official decrees will allow subtle shifts in government policy to be accurately charted. Particular attention is also paid to a number of issues that are often neglected: the employment problems of school and college graduates; the role and professional status of teachers; political control and militarisation in schools; the close detail of higher education curricula; and the rate of student failure. Of special value is the chapter on those educational institutions which are often omitted from Western studies and which are hardly recognised as such in most official Soviet sources.

**Crossing Boundaries, Building Bridges** Annie Canel 2005-08-08

Women engineers have been in the public limelight for decades, yet we have surprisingly little historically grounded understanding of the patterns of employment and education of women in this field. Most studies are either policy papers or limited to statistical analyses. Moreover, the scant historical research so far available emphasizes the individual, single and unique character of those women working in engineering, often using anecdotal evidence but ignoring larger issues like the patterns of the labour market and educational institutions. Crossing Boundaries, Building Bridges offers answers to the question why women engineers have required special permits to pass through the male guarded gates of engineering and examines how they have managed this. It explores the differences and similarities between women engineers in nine countries from a gender point of view. Through case studies the book considers the mechanisms of exclusion and

inclusion of women engineers.
